Grading Inspection by Engineer of Record (Civil Engineer)

I verify that the approximate final elevations and line, grade and surface drainage have been established in conformance with the approved plan and the Uniform Building Code. The portion of this grading work concerning the placement and compaction of fill prior to paving is in conformance with the approved design. The construction incorporates all of the recommendations contained in the report(s) for which I am responsible and all recommendations I have made. This statement is based on field inspections of the work during grading.
